3RD EYE

3rd Eye Digitally Connected Technology

Innovative tools and technology that help develop and maintain a safe and productive vehicle fleet.

The Challenges

Safety is everyone's responsibility, but not everyone fully understands the best ways to achieve this critical objective. Despite our best efforts, mistakes can happen, and the results can be life-changing. Safety isn't always instinctive, and staying updated on the best practices to protect your employees, equipment, and company can be challenging.

Even the industry's top leaders can struggle with developing and maintaining effective safety practices. While training seminars and ongoing guidance are essential, they require continuous diligence to ensure lasting behavioral change across your teams.

Your fleet operates like a factory on wheels, often without direct oversight. That's where the 3rd Eye Driver Safety & Development solution steps in, extending your oversight across the fleet and effectively bridging this critical gap.

The Solution

Safety & Driver Development leverages 3rd Eye industry-leading smart camera systems, combined with specialized hardware and seamlessly-integrated technology solutions specifically designed for monitoring. The robust 3rd Eye solution identifies anomalies in driver behavior and captures video footage, which is then uploaded to the cloud along with telematic data to create a specialized safety event.

These safety events are reviewed by a team of expert specialists who flag best practice criteria, creating reliable coaching materials. Our solution is designed for consistent behavioral coaching, delivered in easily consumable amounts, ensuring that drivers receive actionable insights rather than being overwhelmed by excessive information.

The 3rd Eye digital platform develops a deeper understanding of your drivers and supports you in guiding them towards improved, safer behavior. With features such as video requests, live streaming, and digestible coaching materials, Driver Safety & Development helps keep your team on track for a safer, more productive tomorrow.

Value Overview

- ✓ Improve lives through safety best practices
- ✓ Increase driver accountability
- ✓ Minimize litigation in cases of wrongful accusations
- ✓ Optimize time management
- ✓ Reduce accident downtime through driver education
- ✓ Industry experts to guide you
