

Passively collect events by date, driver, or address, to see
WHAT REALLY HAPPENED.

Let drivers drive. We'll handle the rest.

The Solution

Verif-Eye is your operations' complete package, designed to quickly identify outliers and support your success. Verif-Eye allows you to see what happened in the field and ensure that performed activities align with your plans for the day's routes.

Verif-Eye passively identifies customer touch points, automatically triggering and documenting events with time-stamped, geolocated video and photo. Optional service exception events allow operators to call out issues encountered on route, with near real-time alert messages, that can easily be reviewed.

The added benefit of our integrated services packages allows our system to associate each event to your customers/end users. With an easy-to-use interface you can quickly identify your customers success by understanding exactly what happened and where. The 3rd Eye® digital system is even designed to link in with a tablet that can dynamically provide service data and pull images from the 360-degree peripheral camera system.

Partnering with 3rd Eye provides access to our expert review team, who examine and analyze passively generated events. Referred to as "Use Cases", these flagged events help to identify key factors that could drive value to your business! With Verif-Eye at your side we can work with you to identify what you would like us to find in each Use Case to drive the best value. **With Verif-Eye, winning isn't just an option, it's guaranteed.**

3rd Eye complete fleet management solutions.
Let Your Drivers Drive, We'll Handle The Rest.

Verif-Eye - Fleet Solutions

Powerful positive-service verification that
automates and simplifies the driver's workload.

The Challenges

Fleet management is complex and creates unique complications which make understanding operations difficult. Although you may have answers to some of the challenges that dispatching and operating a fleet may introduce, knowing everything is a difficult if not an impossible task!

With multiple operation processes to manage, knowing when vehicles were dispatched, how far they are into their operational day, task completion status, and efficiency, can be difficult to track and monitor.

The Verif-Eye® module from 3rd Eye can be your partner in the field, helping turn your fleet management from manual to automatic!
