

Clear. Fast. Accurate. Smart AI Capability.

Introducing the revolutionary 3rd Eye G1 Gateway. Delivering unparalleled clarity, speed, and enhanced AI capabilities to your camera systems and technology solutions. **This changes everything.**

**CLEAR FULL HD
RESOLUTION**

**SUPPORTS UP TO
8K RESOLUTION**

**HIGH-PRECISION
GPS ACCURACY**

**AI-READY SMART
CAPABILITIES**

**FAST 4G
UPLOAD SPEEDS**

**60 FPS
SUPPORT**

Discover crystal-clear resolution, enhanced GPS precision/accuracy, fast 4G speed, and advanced AI technology of the 3rd Eye G1 Gateway.

The 3rd Eye G1 Gateway revolutionizes camera and technology systems with unparalleled accuracy, clarity, and AI capabilities, offering crystal-clear visibility, unmatched speed, and intelligent functionality. Experience groundbreaking enhancements that bring your Connected Collections vision into sharper focus.

3rd Eye Connected G1 Gateway

Cutting-edge technology that revolutionizes capabilities of camera systems and technology solutions.

The Challenges

Connectivity and integration are crucial for modern-day organizations. When it comes to running your business, making decisions quickly is critical, and seconds can be the difference between success and failure. When it comes to your complete business, there are many different solutions, and they all need to work together to provide you with the best value. This complex web of integrated requirements is difficult to traverse and can require manual processes that delay key decisions! With the 3rd Eye G1 Gateway, we've got you covered to make better decisions faster.

The Solution

3rd Eye continues to lead the industry with the introduction of our revolutionary 3rd Eye G1 Gateway. The high-definition media enables more value by adding clarity and improving the identifiable information in an image. With 60fps support enables more key frames per second allowing more opportunities per second to get the optimal image at a sub-second interval. Finally, modern H.265 compression with FHD means reduced storage impact! This higher compression allows for quality to remain high while reducing file sizes and data usage, thereby improving access to information.

Our GPS technology has been grown upon as we've enabled access to additional satellites yielding availability in denser and harsher environments. In combination with the incredibly successful 3rd Eye GPS solutions applied to our existing systems to give high accuracy for association, we're expecting this solution to only enhance the success you've seen in the past. With more availability you can expect precise geospatial analysis.

Supporting 4G networks creating speeds of up to 150 Mbps (100 times more capacity than traditional networks). The 4G network solution expands coverage to 99% of the infrastructure within the United States. The faster upload speeds in combination allow videos to be uploaded in key coverage areas 100 times faster for equivalent length of video.

Best of all, our new AI flow engine automates what used to be tedious, manual processes, increasing uptime, and securing the capture of high-value data. With the 3rd Eye G1 Gateway, your Connected Collections vision is clearer and closer than ever.

Value Overview

- ✓ High-resolution images and videos
- ✓ Improved GPS accuracy and precision
- ✓ Higher cellular bandwidth and faster uploads
- ✓ AI ready and capable for all sorts of applications
